

STORMWATER PROTECTION MEASURES

Water that goes down the storm drain is NOT treated and goes directly into the streams.

Clean floormats, filters, and garbage cans in a mop sink, floor drain, or other proper drain area. Do not wash them in a parking lot, alley, sidewalk, street, or storm drain. Mop water should also be disposed of in this manner, not in the street, parking lot, or storm drain.

Recycle grease and oil. Do not pour it into sinks, floor drains, onto a parking lot or street, or down a storm drain.

Keep the dumpster area clean and the lid closed. Do not fill it with liquid waste or use a hose to wash it out.

Use dry absorbents for spill clean up, sweep them up, and dispose of them properly when finished. Do not hose down spills.

If you have questions or need to report illegal dumping, e-mail City of Oak Ridge Stormwater Management at stormwater@oakridgetn.gov or call (865) 425-3497 stormwater.oakridgetn.gov
